SUMMARY

Senior Full Stack Developer with over a decade of experience in web development. Expertise in PHP, Laravel, Vue.js, and WordPress, I have led teams of up to 15 members in my latest role as Tech Lead at Klax Ads, optimizing processes, and delivering high-quality web applications. Skilled in unit testing and achieving a 99% bug-free rate.

I've also developed several popular Laravel open-source packages, including Laravel Translations UI, Laravel Nova Hidden Fields, Nova Fields Agent, and Blade Flags, My packages have been downloaded over 1.2m.

EXPERIENCE

Backend Lead (SA)
03/2024 - Present
Ministry of Industry and Mineral Resources (MIM)

- Led the complete rebuild of a legacy system backend, ensuring seamless integration with modern technologies.
- Successfully migrated and optimized old data, improving performance and reliability.
- Supervised backend development, providing guidance and oversight to ensure best practices were followed.
- Implemented robust backend architecture, enhancing system scalability and maintainability.
- Developed and integrated multiple government APIs, streamlining data exchange and compliance.

Senior Full Stack Developer (UAE)
12/2023 - 07/2024
Mineral Circles Bearings - MCB ↗

- Lead development for an E-Commerce project using Laravel and React, focusing on robust backend functionality and responsive frontend design.
- Managed end-to-end development lifecycle, from database architecture and API integrations to UI/UX implementation using technologies such as Laravel, React, and related tools.
- Directed a team in the implementation of complex features, ensuring code quality, scalability, and adherence to project timelines.
- Spearheaded solutions for critical technical challenges, leveraging extensive experience in Laravel and React to optimize performance and enhance user experience.

Technical Lead
07/2022 - 12/2023
